**FOR IMMEDIATE RELEASE**

## BUILDERADIUS, INC. ANNOUNCES THE RELEASE OF BLUEPRINCE™ QUICK REPORTS

ASHEVILLE, NC - January 27, 2006 - BUILDERadius, Inc., a leading national provider of permitting and inspections software to building permit authorities, announces the release of BluePrince Quick Reports, an improved reporting feature available to all BluePrince community development software customers. This replaces the 1UpReports utility and is accessible via web browser or the BlueReport Client.

BluePrince users will notice a new look with this report utility and recognize many improvements. Quick Reports allows users to run a variety of reports without having to re-enter their login information. This is a significant improvement over the previous utility, which required a UserID and Password before running each report. This often led to login errors, which only appeared after the user had entered all of the information required to build the report. BluePrince Quick Reports validates user login details up front, eliminating this issue.

Like the 1UpReports utility, BluePrince Quick Reports includes several report categories. Each category and individual report are described in detail to help the user select a report that will meet his or her needs. Meanwhile, Quick Reports offers several new reports such as Code Enforcement for BluePrince Version 2 users. Even the way users input data has been improved with the new calendar feature. Dates are now entered with just a few mouse clicks.

BluePrince Version 2 users may access Quick Reports at BlueReport Client startup, or by visiting [www.BuildingDepartment.com/reports](http://www.BuildingDepartment.com/reports). Version 1 users access Quick Reports via this same web address. To get started, users will need their Jurisdiction ID, BluePrince Login Name, and Password.

About BUILDERadius, Inc.

Based in North Carolina, BUILDERadius serves the construction industry with its BluePrince software through [www.BuildingDepartment.com](http://www.BuildingDepartment.com). BluePrince has been developed in consultation with the International Code Council and is distributed as the official replacement for the SBCCI/ICC BDS permitting software.
